Step 1: Login here or create new credentials

https://www.ampliseq.com/login/login.action

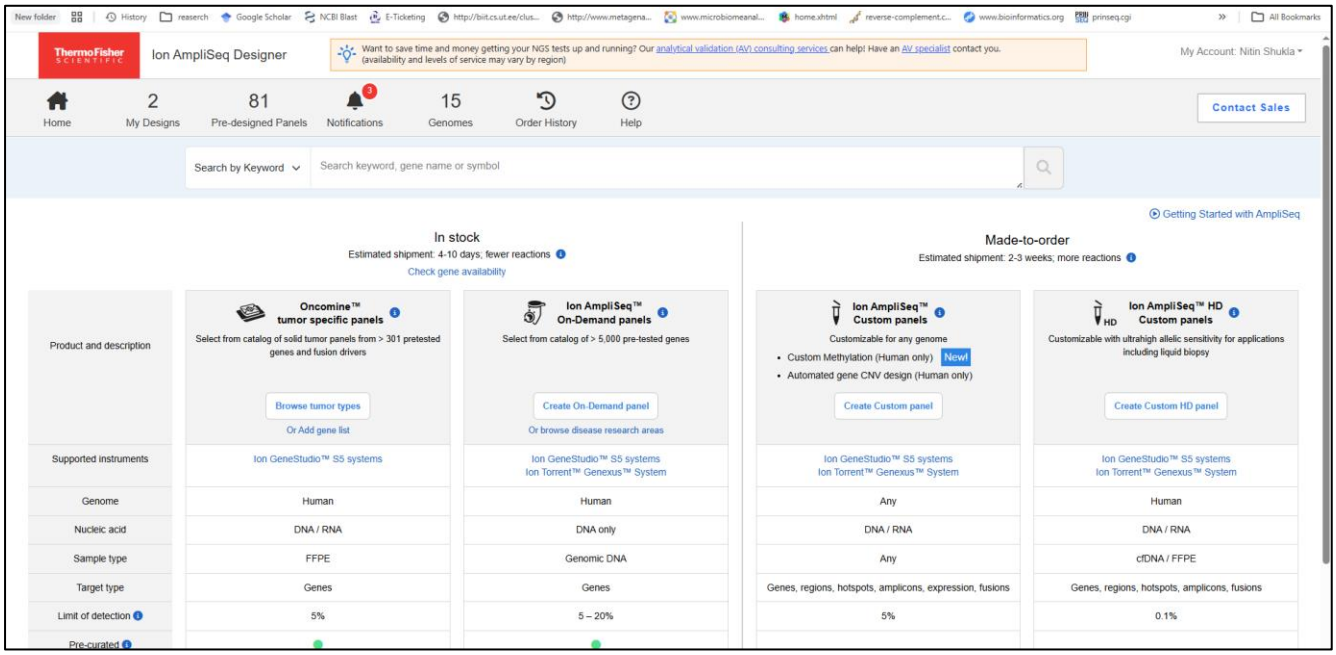

Step 2: You will land here.

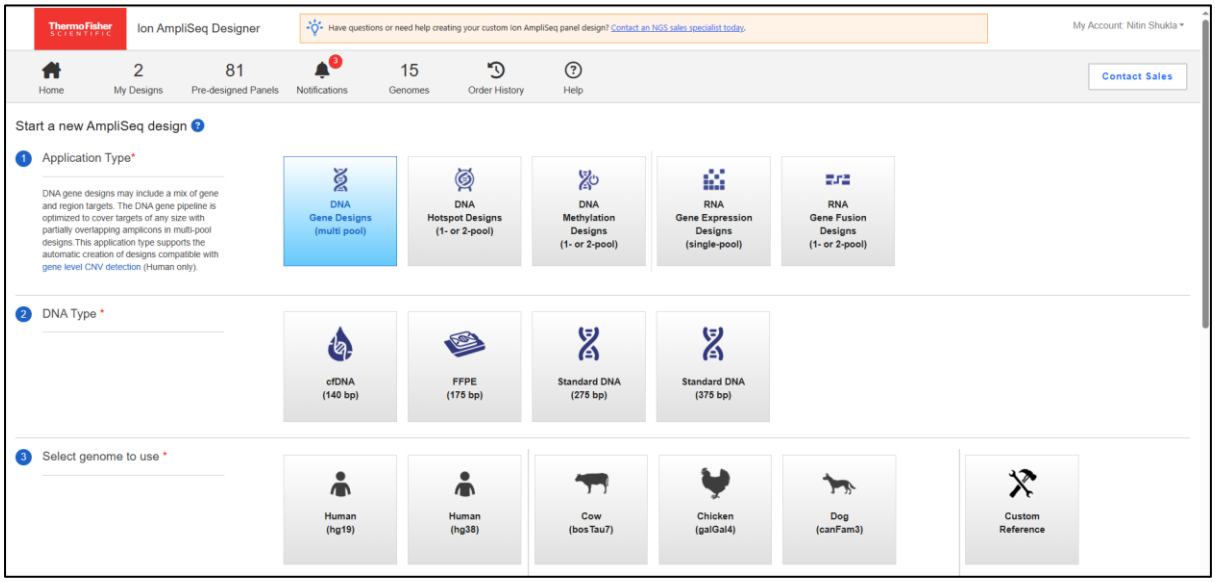

Step 3. Add a custom reference (example: genes.fasta)

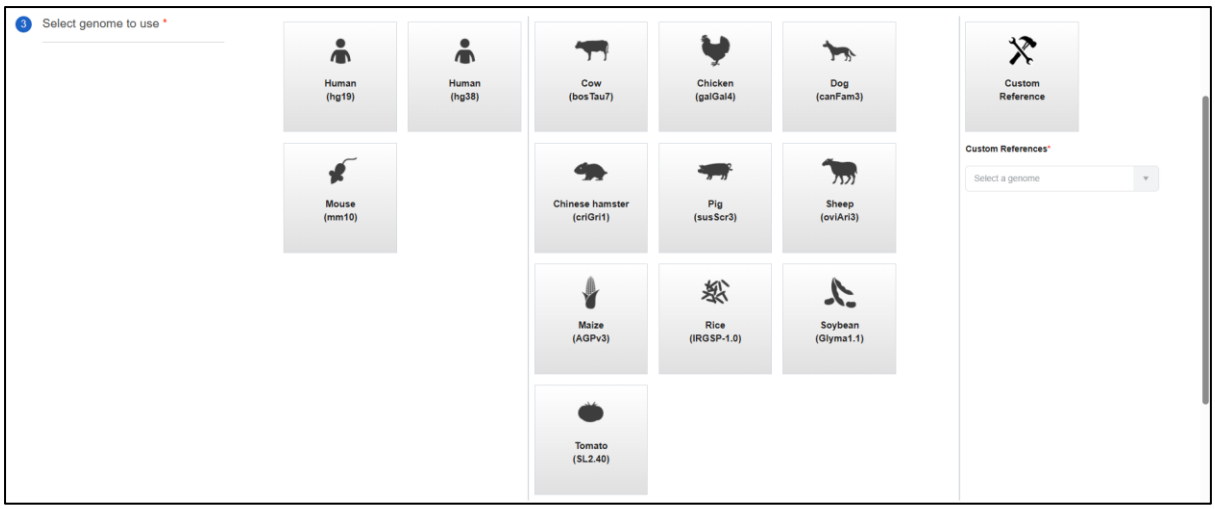

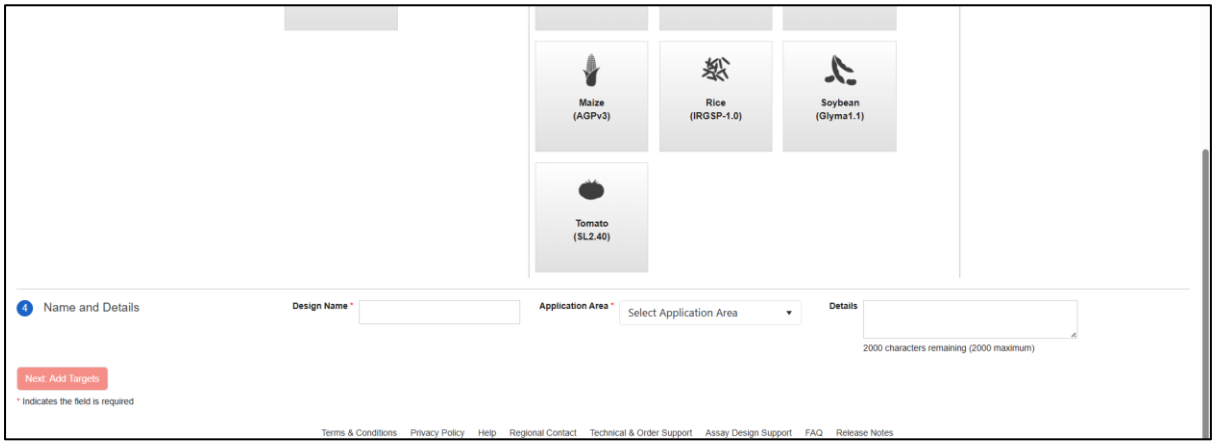

Step 4. Click on Custom panel

Step 5. Select parameters based on sequencing chemistry and target host

Select and add your information

1. In Application Type:

Select: DNA Gene Designs (multi pool)

2. DNA Type

Select: Standard DNA (275 bp)

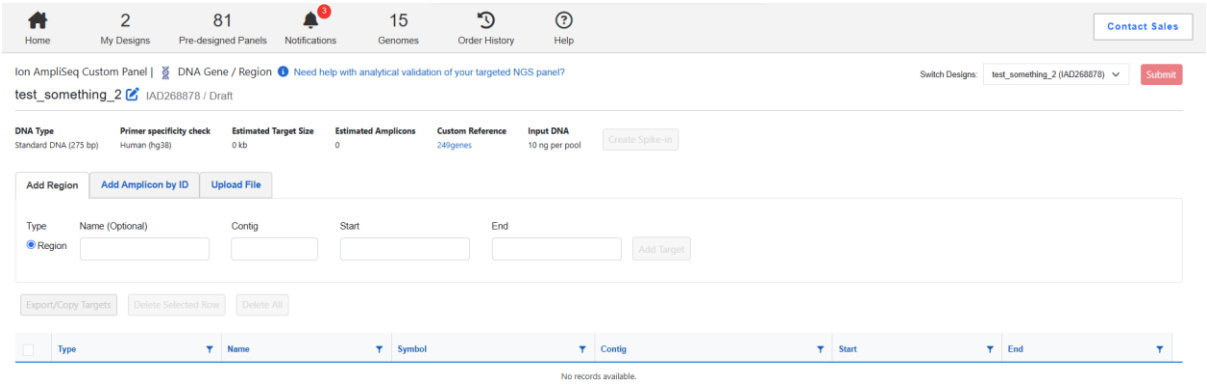

3. Select genome to use

Select: Custom Reference

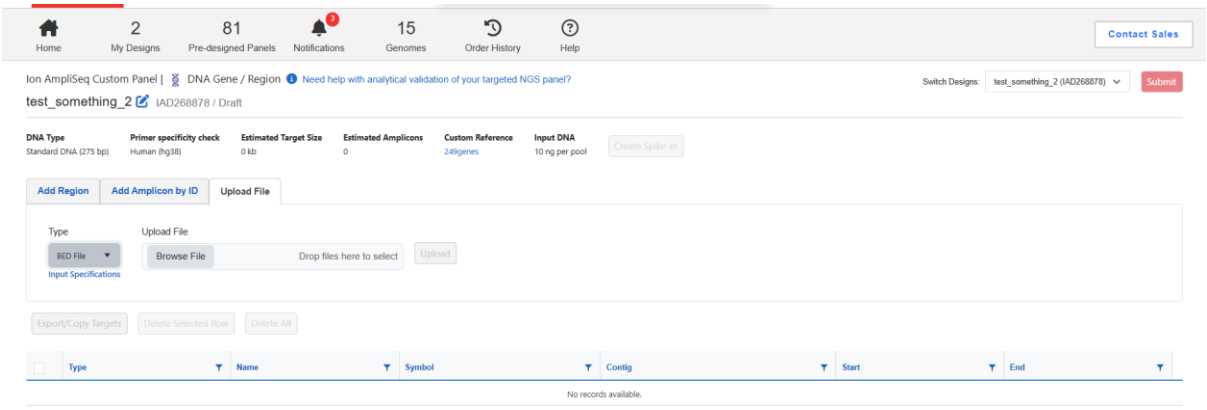

Leave 4.

5. Add name & Details

Step 6. Add regions details

You can manually add details or upload a bed file

File.bed (tab separated)

AcrAB_TolC_1 50 3126 AcrAB_TolC_1

AcrAD_TolC_1 50 3063 AcrAD_TolC_1

AcrEF_TolC__1 50 3063 AcrEF_TolC__1

Alr_1 50 2055 Alr_1

Ddl_1 50 1143 Ddl_1

Note: Remember to remove 50 bp from start and end.
